

Quick Mask

Select flower petals and the stem

1 **Select > Color Range**, adjust **Fuzziness** all the way to the right, and click on blue sky

2 **Select > Inverse**

3 Switch to **Edit in Quick Mask Mode** and use **Brush Tool** to select flower and the stem

4 Switch to **Edit in Standard Mode** and examine precision of your selection

Note: The moment you switch to quick mask mode your brush tool has only black or white color to choose from. Painting with white or black, means adding to or subtracting from selection.

5 When satisfied Feather (**Select > Feather...**) your selection by 2 pixels and **copy** it to the **new** document
