Selecting and Working with Layers

1. Open image **Fruit.jpg**
2. Double click inside **Hand Tool** in the toolbox. This will enlarge the photo to your maximized screen size.
3. Choose the **Magnify Glass Tool** and click and hold on the apple and drag a rectangle to enlarge the apple.
4. Select the **Lasso Tool, hold the Option key** and trace around the apple. When you get around to the starting point release the mouse and then the **Option key.**
5. Hold down the Command key and press C or choose Edit > Copy from the main menu.
6. **Command** > **N** or File > New to create a new document. Type **600px** Width and **600px** Height – with a **Transparent Background.**
7. **Command** > **V** or Edit > Paste. Select **Move Tool** and move pasted apple away from the center. Repeat pasting 10 times. Notice creation of new **layers**
8. **Edit** > **Free Transform** to rotate and resize one of the apples (make it 3 times bigger). When done hit enter key to apply.
9. Change order of the layers by dragging big apple to the bottom and top of the layers
10. **Add a layer styles** to one of the apples (layer)
11. Apply different **filter** to each apple (layer)
12. Click on Background Layer, select **Gradient Tool** and experiment with different options
13. Make one of the apples lighter, and increase contrast by selecting:
    Image > **Adjustments** > **Brightness/Contrast...**
14. Make one of the apples more red by selecting: **Image** > **Adjustments** > **Color Balance...**
15. Make one of the apples lose red color by desaturating red:
    Image > **Adjustments** > **Hue/Saturation...**
16. Use **Type Tool** to sign your artwork
17. **Create warped text** from your signature
18. Repeat above steps by selecting yellow and red roses from original image
